## Price adjustment of Deicing and Anti-Icing fluid as of January 01, 2022

Dear Sir or Madam,

As you may be aware of, the deicing fluid used in aircraft deicing consists to a large extent of the raw material monopropylene glycol (MPG for short).

For reasons that are unfortunately beyond our control, the cost of purchasing aircraft deicing fluids has increased considerably. While prices of less than 1,500 euros per metric ton of MPG were common in the recent past, after a brief easing in the summer this is now around 3,250 euros per metric ton with a renewed upward trend (see graph, red line).

Thanks to advantageous contractual arrangements with our fluid supplier and the very high storage capacity at Frankfurt Airport, we have so far been able to avoid buying expensive deicing fluid.

© 2021 ICIS

Nevertheless, the continuing high cost level unfortunately forces us to pass on the additional costs for fluid procurement and thus to adjust the prices for Deicing and Anti-Icing fluid as follows from January 01, 2022:

- Deicing will increase by 0.17 €/liter from 1.13 €/liter to 1.30 €/liter (+15%)
- Anti-icing will increase by 0.36 €/liter from 2.00 €/liter to 2.36 €/liter (+18%)

We regret very much that we have to take this measure and thank you in advance for your understanding.

Yours sincerely
